

QMainWindow

```
classDiagram
    class QMainWindow
    class TreeView["model_fitting.board_explorer.TreeView"]
    TreeView --|> QMainWindow
```

A UML class diagram showing an inheritance relationship. The superclass is QMainWindow, represented in a box at the top. The subclass is model\_fitting.board\_explorer.TreeView, represented in a box at the bottom. A vertical arrow points from the subclass box up to the superclass box, indicating that TreeView inherits from QMainWindow.

model\_fitting.board\_explorer.TreeView
